List of Authors VI
Preface IX

Central Australia (Arunta Complex and Amadeus Basin)—history of work and outline of problems
Rickard, M.J. (Canberra, A.C.T., Australia) 1
Relationships between deformation and basin evolution in the intracratonic Amadeus Basin, central Australia
Korsch, R.J. and Lindsay, J.F. (Canberra, A.C.T., Australia) 5
Strain and displacement in the Harts Range Detachment Zone: a structural study of the Bruna Gneiss from the western margin of the Entia Dome, central Australia
James, P.R., Macdonald, P. and Parker, M. (Adelaide, S.A., Australia) 23
Crustal scale ductile fault systems in the Arunta Inlier, central Australia
Collins, W.J. (North Ryde, N.S.W., Australia) and Teyssier, C. (Minneapolis, Minn., U.S.A.) 49
Crustal scale ductile fault systems in the Arunta Inlier, central Australia
—Discussion
Ding, P. and James, P.R. (Adelaide, S.A., Australia) 67
—Reply
Collins, W.J. (North Ryde, N.S.W., Australia) and Teyssier, C. (Minneapolis, Minn., U.S.A.) 70
Fault and kink-band relationships at Mystery Bay, Australia
Stubley, M.P. (Macquarie University, N.S.W., Australia) 75
Folding of angular unconformable sequences and effects on early folds, Tabberabbera district, eastern Victoria, Australia
Fergusson, C.L. and Gray, D.R. (Clayton, Vic., Australia) 93
Evidence of syndeformational contact metamorphism from porphyroblast–matrix microstructural relationships
Vernon, R.H. (Sydney, N.S.W., Australia) 113
Lack of porphyroblast rotation in noncoaxially deformed schists from Petrel Cove, South Australia, and its implications
Steinhardt, C. (Townsville, Qld., Australia) 127
Temperature–time relationships across metamorphic zones: evidence from porphyroblast–matrix relationships in progressively deformed metapelites
Reinhardt, J. and Rubenach, M.J. (Townsville, Qld., Australia) 141
Deformation partitioning, shear zone development and the role of undeformable objects
Bell, T.H., Duncan, A.C. and Simmons, J.V. (Townsville, Qld., Australia) 163
The synchronism of crustal thickening and high *T*/low *P* metamorphism in the Mount Isa Inlier, Australia. 1. An example, the central Soldiers Cap belt
Loosveld, R.J.H. (Canberra, A.C.T., Australia) 173
Vein geometry in the Hilton area, Mount Isa, Queensland: implications for fluid behaviour during deformation
Valenta, R.K. (Clayton, Vic., Australia) 191
Basement–cover interaction in the Adelaide Foldbelt, South Australia: the development of an arcuate foldbelt
Clarke, G.L. and Powell, R. (Parkville, Vic., Australia) 209
The Muller anticline, Papua New Guinea; basement-cored, inverted extensional fault structures with opposite vergence
Hill, K.C. (Parkville, Vic., Australia) 227
Structural lithic units in external orogenic zones
Woodward, N.B. (Knoxville, Tenn., U.S.A.) and Rutherford, E. (University Park, Tex., U.S.A.) 247
The strength of the continental crust, detachment zones and the development of plastic instabilities
Ord, A. and Hobbs, B.E. (Mt. Waverley, Vic., Australia) 269
A new simple shear deformation apparatus for rocks and soils
Price, G.P. and Torok, P.A. (Mt. Waverley, N.S.W., Australia) 291
Curved vein fibres: an alternative explanation
Williams, P.F. (Fredericton, N.B., Canada) and Urai, J.L. (Utrecht, The Netherlands) 311
An investigation of the effects of hydroxyl concentration and bubble formation on the electrical conductivity of synthetic quartz
Newton-Howes, J.C. (Clayton, Vic., Australia), McLaren, A.C. (Canberra, Australia) and Fleming, R.J. (Clayton, Vic., Australia) 335
The photometric method of *c*-axis fabric analysis applied to calcite
Price, G.P. (Mt. Waverley, Vic., Australia) and Williams, P.F. (Fredericton, N.B., Canada) 343
